CodeRED Alert Notifications

The CodeRED system is used to send emergency notifications, from evacuation notices to missing child alerts. Residents and businesses located within the Town of Hanover are encouraged to sign up for CodeRED to be sure they receive timely emergency notifications and other important information and instructions when alerts are issued. This is our way of notifying you in an emergency situation.

When you enroll in the CodeRED system, alerts are issued to you by your geographical location. Alerts can be sent to your cell phone, land line, by text, and even email. You get to choose! With CodeRED, you get the option of also receiving the CodeRED Weather Warning. These alerts are automatically generated when the National Weather Service issues a warning for your location. This early warning could prove to be life saving.

The CodeRED alert system is free to Hanover residents. To sign up for CodeRED, click on the picture at the top of the page. It will only take a few minutes to enjoy a service that just may save your life. Please tell all of your friends and family about this invaluable service.
